# LAND USE, NATURE CONSERVATION AND THE STABILITY OF RAINFOREST MARGINS IN SOUTHEAST ASIA

Book Condition: New. Publisher/Verlag: Springer, Berlin | Southeast Asia constitutes one of the world's most extended rainforest regions. It is characterized by a high degree of biodiversity and contains a large variety of endemic species. Moreover, these forests provide a number of important and singular ecosystem services, like erosion protection and provision of high quality water, which cannot be replaced by alternative ecosystems. However, various forms of encroachment, mostly those made by human interventions, seriously threaten the continuance...
