Book Condition: New. Publisher/Verlag: Springer, Berlin | Unfortunately, many general dental practitioners say they do not enjoy constructing complete dentures, describing it as something akin to a black-art. In this book, I wanted to describe the practical procedures and the science behind many of our actions in the clinic so that successful treatment can be applied to patients. So, surprisingly for a manual, the text is analytical, with a critical discussion of pertinent references to published research. I have sought a balanced approach throughout, avoiding controversy for its own sake. The written text has been reduced to the minimum required to explain the principles and techniques of denture construction. Although this book has been written primarily for general dental practitioners, it is hoped that it may also be useful for undergraduate and postgraduate students. Providing satisfactory complete dentures for patients is demanding work, requiring excellent technical, diagnostic and communication skills. If the current epidemiological trends continue, fewer people in the developed world will require complete dentures, but the complexity of treatment is likely to increase as patients' expectations rise. Unfortunately, significant numbers of elderly patients continue to be rendered edentulous late in life when their powers of adaptation to new dentures are much reduced. | 1 Treatment Planning: Assessing the Task Ahead.- The Examination of the Patient's Complaint.- The Gaging Patient.- Medical History.- Examination of the Extraoral Tissues.- Examination of the Oral Tissues.- Examination of the Dentures.- Denture Retention.- Denture Stability.- Denture Occlusion.- Examination of the Hard Tissues.- Examination of the Soft Tissues: Denture Stomatitis.- Treatment of Denture Stomatitis.- Adjusting the Occlusion in Patients with Denture Stomatitis.- Cleaning the Dentures in Patients with Denture Stomatitis.- Improving Tissue Adaptation in Patients with Denture Stomatitis: Technique for Chairside Reline.- Resilient Lining Materials.- Other Soft Tissue Abnormalities.- Prognosis...
