

Complex Systems - Operational Approaches in Neurobiology, Physics, and Computers

Filesize: 4.06 MB

Reviews

This ebook will never be effortless to get started on studying but extremely fun to read through. It is actually written in easy phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Pearl Corwin)

COMPLEX SYSTEMS - OPERATIONAL APPROACHES IN NEUROBIOLOGY, PHYSICS, AND COMPUTERS

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the International Symposium on Synergetics at Schloß Elmau, Bavaria, May 6-11, 1985 | A great deal of the success of science has rested on its specific methods. One of which has been to start with the study of simple phenomena such as that of falling bodies, or to decompose systems into parts with well-defined properties simpler than those of the total system. In our time there is a growing awareness that in many cases of great practical or scientific interest, such as economics or the human brain, we have to deal with truly complex systems which cannot be decomposed into their parts without losing crucial properties of the total system. In addition, complex systems have many facets and can be looked at from many points of view. Whenever a complicated problem arises, some scientists or other people are ready to invent lots of beautiful words, or to quote Goethe "denn immer wo Begriffe fehlen, dort stellt ein Wort zur rechten Zeit sich ein" ("whenever concepts are lacking, a word appears at the right time"). Quite often such a procedure gives not only the layman but also scientists working in fields different from that of the inventor of these new words the impression that this problem has been solved, and I am occasionally shocked to see how influential this kind of "linguistics" has become. | Operational Approaches to Complex Systems. An Introduction.- I Evolution.- Effects of Finite Population Size and Other Stochastic Phenomena in Molecular Evolution.- II Functions of the Brain in Man and Animals.- Computation of Sensory Information by the Visual System of the Fly (From Behaviour to Neuronal Circuitry).- Multi-Neuron Experiments: Observation of State in Neural Nets.- Investigation of a Small Volume of Neocortex with...
