Brand New Book ***** Print on Demand *****.Excerpt from The Artist Tradesman s Guide To the manufacturer, chemistry has lately become fruitful of instruction and assistance. In the arts of brewing, tanning, dying, and bleaching, its doctrines are important guides. In making soap, glass, pottery, and all metallic wares, its principles are daily applied, and are capable of a still more useful application, as they become better understood. Indeed every mechanic art, in the different processes of which heat, moisture, solution, mixture or fermentation is necessary, must ever keep pace in improvement with this branch of philosophy. Finally, there is scarcely an art of human life, which the science of chemistry is not fitted to subserve; scarcely a department of human inquiry, either for health, pleasure, ornament, or profit, which it may not be made in its present improved state, eminently to promote. To illustrate the science fully, in all its parts, would require more pages than this work is designed to contain; therefore, we shall be confined to some of the leading principles, and most useful practical operations, which it embraces. The science of chemistry naturally divides itself into three parts; a description of the component parts of bodies, or of elementary or simple substances as they are called, - a description of the compound bodies formed by the union of simple substances, and an account of the nature of the power which produces these combinations. This power is known in chemistry by the name of affinity, or chemical attraction. By simple substances is not meant what the ancient philosophers called elements of bodies, as lire, air, earth, and water, nor particles of matter incapable of farther diminution or division. They signify merely...
